7 Reasons to Participate in the 8th Agro Bangladesh 2025

1. Bangladesh's agriculture sector is the foundation of the economy, creating jobs and adding around \$50 billion to the country's GDP. For these factors, it is frequently cited as one of the most essential sectors for eradicating poverty and creating employment.
2. Numerous agricultural technologies, including reapers, axial flow pumps, and seed fertilizer drills, are currently used in Bangladesh. In just five to six years, Bangladesh has used seed drills to cultivate more than 640 hectares of land for over 1,300 farmers, just in the Barisal district!
3. A robust, reasonably priced labor force, a sizable and expanding domestic market, an improving investment climate, and tax exemptions are just a few of the many advantages Bangladesh has to offer for prospective investors.
4. Agribusiness in Bangladesh supports about 100 million people, more than half of the country's population of 170 million which is evident that the importance of agriculture is not shrinking because it ensures food safety and provides raw materials for multiple manufacturing industries.
5. The potential of the country's agribusiness sector is significant. According to BIDA, which oversees and promotes private investment, the agribusiness sector produces about 70 million metric tons of output, mainly rice, potatoes, and sugar crops.
6. According to statistics the Foreign Direct Investment (FDI) in the Agriculture & Fishing sector of Bangladesh was US\$ 284.66 million in 2019 and the government of Bangladesh has undertaken multiple steps such as 'action plan for 2022-23 fiscal for the agricultural sector' to increase investment in the sector.
7. The government of Bangladesh acknowledges that there are 16.5 million farmers in the country and is taking steps to keep agricultural expenses at the farmer's level by providing subsidies. This will increase opportunities and maybe spur future growth in the sector.

WHY BANGLADESH? WHY NOW?

Bangladesh began its journey in 1971 with a production of 10 million Metric Ton rice, the staple food for its about 76 million people inhabiting in a 142 thousand square kilometers of land. Now the nation managed to triple its rice production which is over 34 million Metric Ton in a cultivable land of 8.5 million hectares only. The contribution of agriculture sector to the GDP of the nation is approximately 50 Billion USD and it still absorbs the biggest share of labour force. Bangladesh has made remarkable development in agriculture sector in recent years. It is no doubt that the agriculture sector of Bangladesh is a Major sector and investing in this sector is almost always rewarding because the country has such a long term experience in the industry. Not only does the Nation successfully grow enough crops to feed its population but it is also involved in mass export of Rice, Jute & Tea. It is said that approximately 30% of Bangladesh's GDP comes from agriculture and this sector employs 60% of the Labour force of the country- which makes it largest producing economic sector of the country.
